

Glass Doors (True Divided Lite)

GLASS DOORS: Glass Doors are available with a profile option to match your raised or flat panel doors. Glass Doors includes a series of door styles that are constructed with true divided lites and lumber core stiles/rails. Glass Doors are available in both 1 3/8" and 1 3/4" thicknesses.

TRUE DIVIDED LITE CONSTRUCTION:

All "glass" doors are crafted as True Divided Lite. (Each lite of glass is an individual pane of glass.) Glass is installed in the door with a "compression fit" - which means each pane of glass is built into the door and secured within the profile groove.

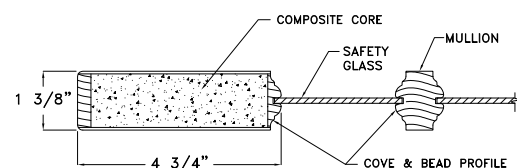

A variety of decorative insert options are available. See page 38 in the Glass Door section for availability.

"SAFETY" GLASS:

All glass supplied or installed is a "safety" glass. Tempered safety glass has a small stamp in the lower right corner of each pane as required by building codes.

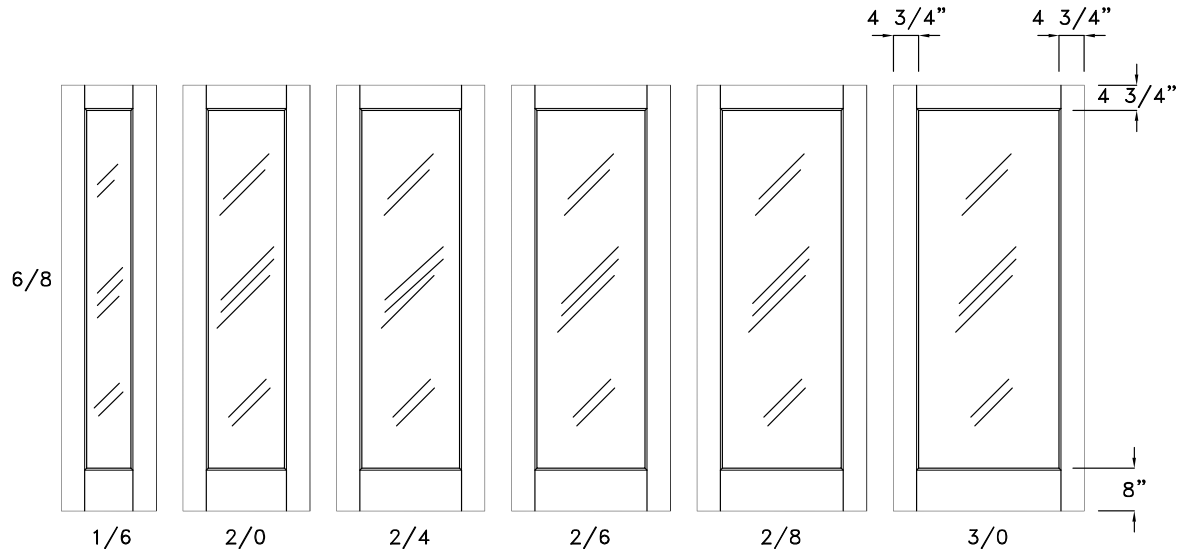

PLASTIC-WRAPPED GLASS FOR PROTECTION:

All glass is plastic wrapped from the glass manufacturer for protection during shipment, handling, installation and finishing. To remove plastic wrap after final installation of the door, carefully pull the wrap away from the glass while cutting. Use a new, sharp razor blade - Insert the blade under the edge of the stop molding and carefully cut the plastic. **Do not touch the glass with the cutting blade - Use caution when removing the plastic wrap to prevent scratching the glass.**

Glass Doors (True Divided Lite)

G011

STANDARD SIZES (Nominal)

Door Heights: 6/8, 7/0, 8/0
 Passage & Pocket Doors: 1/6, 2/0, 2/4, 2/6, 2/8, 3/0
 Double & Pocket Doors: 3/0, 4/0, 4/8, 5/0, 5/4, 6/0
