# Door Styles

## STRATTON

3/8" round holes with square pegs in random rotation located in door corners only (not at rail intersections), sanded flush with the door. Pegs are matching wood species (e.g. Cherry door has cherry pegs) end-grain which absorbs more stain for a darker contrast. Contrasting species available on request. Not recommend for Enamel finishes.

- ☒ **STRATTON DOOR**
  - ☐ Standard Hip
  - ☐ Double Hip
- ☒ **Specify a Profile Option**

**DOOR CONSTRUCTION:** 5-Piece door construction. 3/4" thick frame with cope and sticking joinery, 3" stiles and rails and furniture pegs at each outside corner. Center panel is 3/4" thick with vertical grain and Standard Hip or Double Hip profile options. See Pages A18-A19 for drawer front construction.

### SIZING LIMITATIONS

## NOTTINGHAM

The **Nottingham** door style is designed for **wall** cabinet applications. (Slatted section has a fixed dimension of 9") Coordinate with the **Brittany** door style and drawer fronts for base cabinets.

**DOOR CONSTRUCTION:** 3/4" thick frame with cope and sticking joinery. Upper section has decorative slats that are 3/4" wide, 1/4" thick, and spaced 5/8" apart. Clear glass is installed behind the slats and secured with glass clips. The slatted area height is a constant fixed dimension. The panel is 3/8" composite-core plywood with decorative applied molding that matches the Brittany door style. See Pages A18-A19 for drawer front construction.

### SIZING LIMITATIONS

#### Nottingham Door:

Height: Minimum: **18 1/2"**

(Below 18 1/2" doors are built with slats only)

Maximum: **53 1/4"**

(62" maximum with an additional intermediate rail)

Width: Minimum: **6 1/4"**

(Doors below 7 1/4" wide have 1 3/4" wide stiles)

Maximum: **24"**

## LAREDO (WIRE BRUSHED)

**REQUIRES  
EXTENDED LEAD TIME**

**Laredo Door  
Styled Drawer Front**

**Laredo Door  
Manor Flat Drawer Front**

**AVAILABLE  
EDGE SHAPE**

- Wire Brushed texture is on doors and drawer fronts only, not available on other finished components such as Finished Ends, Face Frames, Molding, etc.
- Wire Brushed texture only appears on the face of the panel and stiles and rails. Outside edges and profiles are smooth.

**DOOR CONSTRUCTION:** 5-piece door construction, 3/4" thick frame with cope and stick joinery, solid wood center panel is 3/8" thick with vertical grain and Prairie profile. Wire Brushed with random removal of surface material from both door panel and stiles and rails. Softer materials from the face are removed within growth rings for a noticeably textured look and feel.

### SIZING LIMITATIONS:

#### Laredo Door:

Height: Minimum: **7 1/2"**  
Maximum: **42"**  
(62" maximum iwth intermediate rails and 2 panels)

Width: Minimum: **7 3/8"**  
Maximum: **24"**
