CABINET CARE & CLEANING - STAIN & ENAMEL

Cabinetry by Woodharbor requires a very minimal maintenance program to preserve its beautiful finish. A Woodharbor finish is specially formulated to “flex” with the wood to create an especially durable finish. Woodharbor’s finish is formulated with a “catalyst” to create a very strong bond with the wood surface and with UV inhibitors to reduce natural mellowing of the finish from exposure to sunlight.

Woodharbor recommends the following care and cleaning program:

- Use a soft cloth to remove construction/installation dust from all surfaces.
- Clean your new cabinets/doors with a soft cloth and a solution of water and mild dish soap and then dry with a soft, lint-free cloth.
- Dust or polish your Woodharbor cabinetry/doors often with a clean, soft cloth.
- Always wipe with the direction of the grain.
- Clean any spills as soon as possible – blot rather than wipe.
- Do not use your dishcloth to clean your cabinetry or doors.
- Do not use harsh cleansers, detergents, commercial cleaners or abrasives.
- Do not use wax or silicone-based polishes.

If you have any further questions regarding the care and cleaning of your Cabinetry by Woodharbor, please contact your local Authorized Woodharbor dealer.
