## CABINET CARE & CLEANING - THERMOFOIL

### Regular Care and Cleaning

Always use a cotton cloth or non-abrasive sponge

Option 1: Wipe with a damp cloth or sponge with mild dish soap.

Option 2: Wipe with a damp cloth or sponge using 50/50 mix of water and Simple Green®. (Simple Green works well on oily or tacky surfaces)

### Cleaning Stains (Infrequent Care)

Always use a cotton cloth or non-abrasive sponge

Step 1: Using a damp cloth or sponge with a 50/50 mix of water and Simple Green, scrub lightly for 10 or 20 strokes. This should remove most stains. If stain persists, move on to Step 2 and if necessary, Step 3.

Step 2: Using a damp cloth or sponge with Buckeye Workout®, standard Fantastik® (S.C. Johnson), or standard Forumula 409® (The Clorox Co.), lightly wipe for 10 to 20 strokes. Note: Buckeye Workout contains water and propylene glycol phenyl ether.

Step 3: Place a cloth or sponge damp with 70% Isopropyl Alcohol on top of the stain for 30 minutes. After 30 minutes, remove the cloth or sponge and wipe. This should remove makeup, ball-point ink, and other stubborn stains.

If stain persists, repeat Step 3 until stain is removed.

### Disinfecting Thermofoil Surfaces

A mixture of 10% bleach, 90% water can be used as a disinfectant on most thermofoil surfaces. Before using the mixture on an entire surface, be sure to test it on an inconspicuous spot.

#### Cleaners to Avoid

- Any abrasive cleaner
- Most solvent based cleaners and harsh chemicals such as sink & toilet bowl cleaners
- Any cleaner in combination with a brush
- Cleaners containing ammonia
- Baking Soda

If a harsh chemical is spilled on a thermofoil surface, wipe it up immediately. Then wash the surface with soap water and rinse several times. If you have any further questions regarding the care and cleaning of your Cabinetry by Woodharbor, please contact your local Authorized Woodharbor dealer.
